GRAND CANYON

Embrace the striking beauty of rugged, natural landscapes with the sophisticated design of ProQuartz Grand Canyon. This premium 20mm engineered stone features a refined off-white and soft grey foundation layer, deeply textured with intricate mineral speckles and organic stippling that echoes the timeless artistry of carved stone canyons.

Far from a standard flat color, Grand Canyon offers an incredibly rich visual movement that shifts gently with the light, making it a spectacular focal point for modern industrial, minimalist, or contemporary South African architecture.

<i>Furniture surfaces</i>	

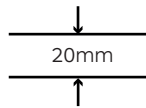

ANTARCTICA

Its subtle visual movement is defined by delicate, cloud-like mineral formations that wash across the surface, offering a deeply textured look without overpowering a room. It is the perfect choice for architects and designers seeking an organic, architectural surface for minimalist kitchens, expansive floor-to-ceiling wall cladding, or peaceful bathroom retreats.

The sensory leathered/matte texture completely redefines the feel of the stone underfoot or hand, offering a smooth, velvet-like finish that is incredibly forgiving with fingerprints and everyday smudges. Engineered for premium performance, this low-maintenance quartz slab is entirely non-porous and highly resistant to scratching, etching, and moisture absorption—delivering the raw look of weathered stone with the superior durability of advanced engineering.

SERENGETI

Bring the raw, commanding spirit of the natural world indoors with ProQuartz Serengeti. A crowning jewel of the premium Wonders Collection, this engineered quartz slab features a rich, dark charcoal canvas dominated by rolling waves of slate grey and stormy mineral textures.

The dramatic, sweeping diagonal patterns capture the unrefined artistry of volcanic stone, offering a moody and sophisticated look. It is an extraordinary design choice for creating high-impact monolithic kitchen islands, dramatic feature walls, or executive bathrooms.

EVEREST

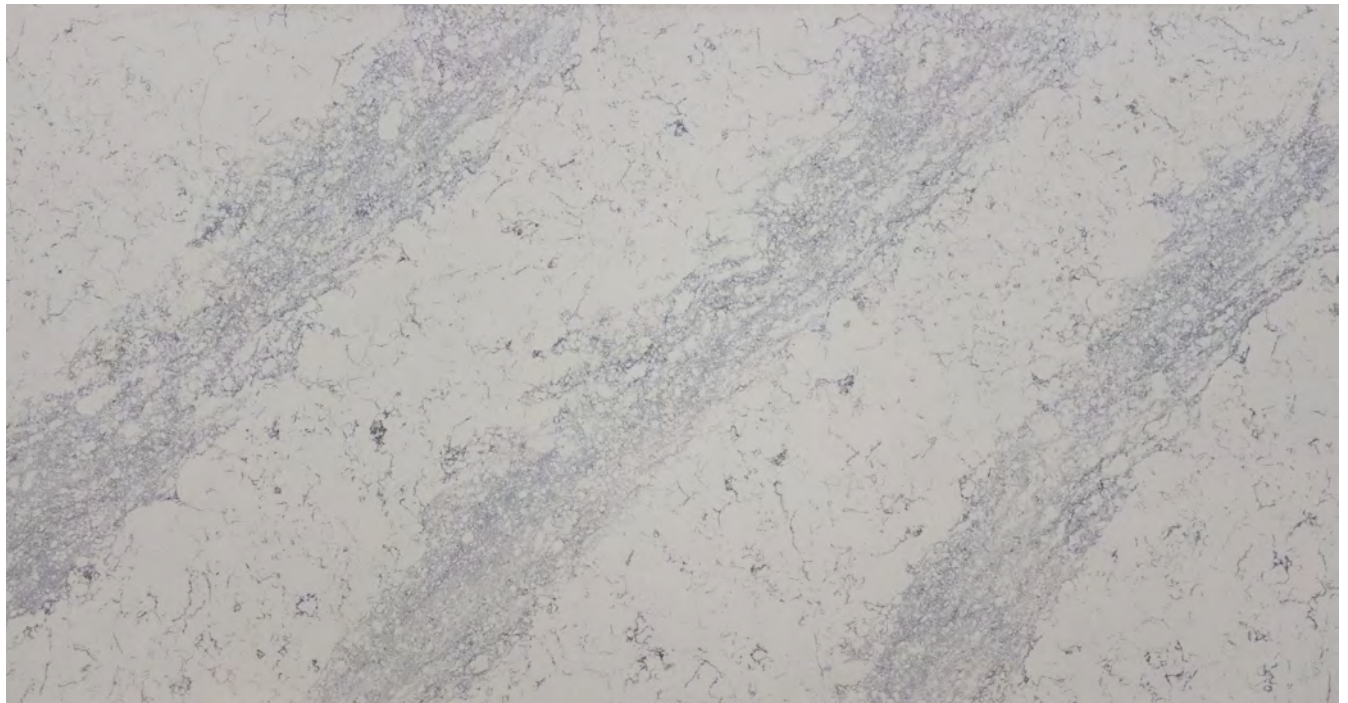

To suit your design language, Everest is available in a high-gloss polished finish that bounces light beautifully to amplify stone depth, as well as a contemporary matte finish for a softer, glare-free aesthetic.

Offered in a massive 3220 x 1850mm jumbo size, it gives you the freedom to clad expansive kitchen countertops, waterfall edges, and dramatic splashbacks with fewer seams. Crafted from top-grade quartz, Everest is completely non-porous and highly resistant to scratching and everyday staining, providing unmatched durability without sacrificing high-end style.
